2.0	The firm Raky-Damubia, Scilerstactte 16, Vienna I, has a contract with the STV for the exploration of mas deposite in this area. Two experimental borings by this firm are in progress.				
3.	The Bau und Montage Abteilung of the SMV is building a water supply line for this field.				
li s	The two former DEA fields (DEA I and DEA II) have now been brought under a joint administration called SEB Neusiedl. Four experimental borings are now in progress on this field near the villages of Ringelsdorf and Droessing. One of these has renched 600 meters.				
r.,	The maintenance term of STB Neuciedl (swab gang) employs 21h workers. Of these, 75 belong to the bore maintenance parties, 96 work in the extraction stations and 43 work on deparaffinisation. The use of "Axelson" pumps for the cleaning of bores has been introduced recently on this field, which means that the pipes do not have to be taken out of the bore.

- 7. An overhaul of the distillation plant of the Lobau refinery of the Cesterreichische Mineralölwerke Cabil was carried out recently. The following parts
 were repaired or renewed where necessary: the fireclay lining of the heating
 plant, the fraction column, the draining tank, the condensers, all gate-valves
 and other valves. All storage and other tanks were cleaned and the boiler
 house was revaired. The repairs were carried out on orders of the Russian
 director Gorlov, fnu.
- \mathcal{E}_o The Russian director of the SMV refinery in Korneuburg has been sent to Russia, and director Selitzky, fnu, has taken his place.
